

26.01.21

L/O: To be able to divide a 2-digit number by a 1-digit number

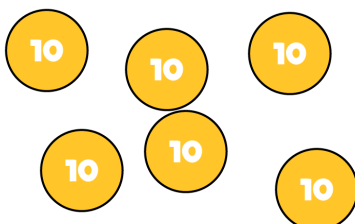

Draw the place value counters into the place value grid to share the amount equally.

Remember, you will need to exchange so that each group has the same value.

Cross out the tens that you are exchanging and draw the ones so that you are totally clear with your calculations and working out.

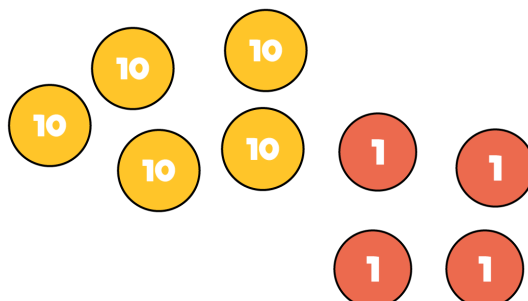

Tens	Ones

1. $60 \div 5 = \underline{\hspace{2cm}}$

Tens	Ones

2. $54 \div 3 = \underline{\hspace{2cm}}$

Tens	Ones

3. $72 \div 4 = \underline{\hspace{2cm}}$
