

28.1.21

L/O: to be able to divide with remainders

Dora has 19 counters.

She arranges her counters into equal groups and has some counters remaining.

Arrange her counters to show equal groups and remainders.

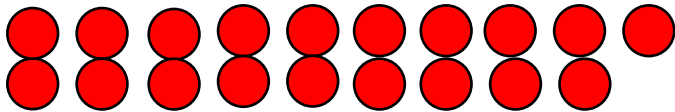

The first is done as an example.

Make it:

Draw it:

Write it:

Groups of 2:

9 groups of 2 and 1 remaining

$$19 \div 2 = 9 \text{ r } 1$$

Groups of 3:

Groups of 4:

Groups of 5:

Groups of 6:
