

Science		
Learning objective: LO. I can predict what will happen to seeds in different conditions.		
I can remember to...	What I think	What my teacher thinks
Talk about what plants need to be able to grow well	☐	
Observe and talk about what has happen to the plants we have grown in different conditions	☐	
Write a sentence to say what has happen to the plant		

This is what we did at school last week! We planted cress the week before and decided to keep it in 4 different conditions, with water and sun, with water no sun, with no water but sun, no water and no sun. We recorded what happened the week later.

Our Plants	
	
	
	
	
	
	
	
	

Add your own photos or drawings into this blank sheet for your growing experiment at home! Or find your own way to record your work at home.
