

STAR WARS

BB-8

Helpful droid

BB-8 is a clever and loyal astromech. He is very handy on missions because he carries lots of tools inside his round body. BB-8 joined the Resistance with Poe after their time in the New Republic.

Things you need to know about BB-8

- 1** BB-8 is a modern droid built by Industrial Automaton, the same company that makes R2 units.
- 2** Nowadays he mainly keeps Rey company on Ajan Kloss.
- 3** BB-8 has been separated from Poe before. He once went on a spy mission to the Colossus fuelling station.
- 4** He is more than happy to look after his new droid friend, D-O.
