

To answer these questions, write as many equivalent fractions as you can to find the simplest form.

1. There are 12 fish, so what fraction of the animals are **fish**?
2. What fraction of the animals are **black and white**?
3. What fraction of the dogs are **dalmatians**?
4. What fraction of ears belong to **cats**?
5. The answer is $\frac{1}{11}$. What could the question be?
6. There are 6 rabbits at the pet shop. There needs to be the same amount of rabbits living in each hutch. What fraction could live in a hutch?

7. How many yellow fish are there? How many blue fish? How many turquoise fish? How many red fish?
Show the simplest fraction of each colour of fish.

8. Make up your own fractions question for your parents or a partner. Make sure that you work out the answer so you know if they got it correct or not!
