

1) 12 counters.

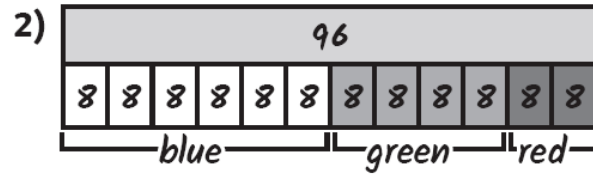

$\frac{1}{2}$ of 12 counters is 6

6 counters + 2 = 8

$$12 \div 6 = 2$$

$$\frac{1}{6} = 2$$

$$\frac{4}{6} = 8$$

$$\text{Blue} = \frac{1}{2} = \frac{6}{12} = 48$$

$$\text{Green} = \frac{4}{12} = 32$$

$$\text{Red} = \frac{2}{12} = 16$$

Answer: $\frac{2}{12} = 16$ of the sweets are red.

3) $\frac{2}{3}$ of 270 = 180
