Subtraction

Use the following steps to solve a two- step subtraction. An example is done for you. Use the RT's.

1. Show the gap on the numberline
2. Mark a sensible number in the middle (next 1000)
3. Do the first jump (Jigsaw number)
4. Do the second jump (take away the sensible number)
5. Add the two jumps together (column addition)

$$6532 - 3421 = 3111$$

1) $8492 - 4563 =$

2) $6511 - 2344 =$

3) $7398 - 5621 =$
