

MONDAY – LEVEL 2 – FLUENCY

- 1 Match each equation to the part-whole model it represents.

$$y + 7 = 18$$

$$2y + 4 = 18$$

$$3y = 18$$

Write equations to represent the bar models.

Is there more than one possible equation for each?

Draw a bar model to represent each equation.

a) $3a = 21$

c) $6 + 9 = c$

b) $2b + 6 = 10$

d) $\frac{d}{2} = 7$
