

TUESDAY – LEVEL 2 FLUENCY

Fill in the missing numbers.

a) $\frac{9}{10} = \frac{90}{100} = 90\%$

c) $\frac{9}{50} = \frac{18}{100} = 18\%$

b) $\frac{9}{20} = \frac{45}{100} = 45\%$

d) $\frac{9}{25} = \frac{36}{100} = 36\%$

5a. Match equivalent fractions to the correct percentages.

$\frac{3}{5}$	$\frac{5}{100}$	20%
$\frac{26}{50}$	$\frac{60}{100}$	52%
$\frac{1}{20}$	$\frac{20}{100}$	5%
$\frac{5}{25}$	$\frac{52}{100}$	60%

Note: Hand-drawn lines connect $\frac{3}{5}$ to 60%, $\frac{26}{50}$ to 52%, $\frac{1}{20}$ to 5%, and $\frac{5}{25}$ to 20%.

6a. Shade the squares to show $\frac{6}{20}$ and write as a percentage.

7a. Competitors in a gym competition need more than 75% to get to the final. What percentage did each child score?

Ava-Lily	$\frac{38}{50}$	Ava-Lily scored 76%
Tyrese	$\frac{8}{20}$	Tyrese scored 40%
Rochelle	$\frac{18}{25}$	Rochelle scored 72%

Who gets to the final?

8a. True or false?

true because $25 \times 4 = 100$ so you have to do the same to the top and that is $7 \times 4 = 28$ therefore it is 28%

$\frac{7}{25}$ is equivalent to 28%.
