

TUESDAY – challenge

Patsy, the postal worker, is arranging some parcels on the shelves in the post office.

- 1) How could she arrange the three parcels so that they sit on the shelf with no gaps? (Think about turning the parcels round so they could fit.)
- 2) How could Patsy fit the same parcels on a shelf which measures 1.05m?
- 3) Patsy receives three more parcels. When placed on the shelf below, there are no gaps between them.
