

The boy king

Tutankhamun

Introduction

Why is Tutankhamun so

famous? His time ruling over Egypt was hard, as his dad's rule made Egypt start to crumble! Tutankhamun also had to deal with many problems (wishes were) as missing bones in his foot meant walking was difficult. He was just known as 'the boy king' but since all the artifacts - I hope together against it uncovered his true life. The first thing

we find is, he was a waring
king.

The life of Tutankhamun

Tutankhamun's, soot problems ment
is he was to ride his ~~II~~ chariot
and sin his bow it would be very
hard. In the rule of his father,
berrible things happend. He lost
lots of his land and he tried to
build a city but the worker were
between 6-25! A ster his father's
death Tutankhamun had to restore
Egypt and the quickest way was
the Father's
war.

The treasure of the Tomb

The reason Tutankhamun is so
samous is because of his treasure

although the ancient Egyptians
wanted him to be forgotten. His Treasure
was amazing. His death mask is solid
gold with gems on. It is
seen as the face of
Egypt. Certainly
not the most
of his treasures but one
of his servants is
a dagger. The handle is solid gold and
the blade was from space as it is
made from meteor and no one has
really got any thing like it. Did you
know that Tutankhamun had 64 chariots,
all would have two horses
pulling it & when he
was riding in his chariot
he would all so fire a
bow and arrows. 64 bows
were found in the tomb and
thousands of arrows.

His dynasty

Tutankhamun was the last of his dynasty the 18th of Egypt. Each pharaoh (we have a king the an Egyptians had a (S) pharaoh) has its royal blood line (onec) once the dynasty. Tutankhamun's dad did many bad things like making his on religion, maybe killing a whole generation and sadly Tutankhamun had to pay for that. Nearly every one thinks that Tutankhamun had no children. But Howard Carter, the sinder of the Tomb, found two little cossins with un born girls in them. They were his un born children the reason they died young is because they thought that they were half god and is didn't marry a royal they would not have be half god! The two girls paid the ultimate price. That is why the 18th dynasty was called a curse.

Second Hand Treasure

Did you know lots of Tutankhamun's Treasures were actually from different kings. Most mysteriously is the Death mask because the gold has a different shine on it. But it was his, it is just because his death was earlier than expected because he was only 19. He died from a smashed ribcage because he fell off his chariot and died unexpectedly.

The Findings of the Tomb

Howard Carter and Lord Carnarvon were the finders of the Tutankhamun's Tomb. This happened all in 1922.

The reason it is the most famous is because it is the only one ancient Egyptian Tomb that hasn't been grave robbed. The reason being it was

the (thereof) buried under the ground.

Where as most of
pharaohs were buried
in pyramids. Now
in 2020 all of Tutankhamun's
treasures are found in a
museum in Egypt.
