

Learn Its

$$5 \times 4 = 20$$

$$6 \times 4 = 24$$

$$7 \times 4 = 28$$

Addition Learn Its

$$7 + 6 = 13$$

$$6 + 7 = 13$$

I can add and subtract multiples of 10.

1b. Complete the calculations.

VF

2b. Fill in the missing numbers.

H	T	O

$$534 + 1 \text{ ten} = \boxed{}$$

$$534 + \boxed{} = 594$$

$$\boxed{} = 534 + 40$$

$$564 = 534 + \boxed{}$$

VF

3b. Count in tens to solve the calculation.

Write a list of the numbers you counted.

	7	5	6
+		4	0

VF

Reasoning

5b. Sanjay says,

To solve $468 - 60$,
I don't need to count
back in tens.

Is he correct?
Convince me.

R

Problem Solving

3b. Find all the possible solutions by filling in the missing digits.

$$4 \ 5 \ 2 + \boxed{} \ 0 = 4 \boxed{} \ 2$$

$$8 \ 4 \ 7 + \boxed{} \ 0 = 8 \boxed{} \ 7$$
