

Name:.....

Mematee

Date:.....

MY CREATURE IS A.....

DIET

What does it eat?

It mainly eats small fish caught in shallow waters. It also eats shoreline plants.

HOME

Where does your creature live?
What is its home made from, and why?

It shelters in caves on the shoreline, rests on the sand and spends a lot of its life swimming in the water.

TRANSPORT

How does your creature move?

It swims by using its tail and flippers and it has a very stream-lined body. On the sand it shuffles along using arm-like flippers.

PREDATOR OR PREY?

Will your creature be hunted by other animals?

How will it keep safe?

How will it catch its prey?

It swims mostly in shallow waters to avoid sharks and to catches small fish to eat.

CLIMATE

How is your creature adapted for its climate?

The skin is thick and tough which protects it from the heat of the sun and sharpness of the rocks and sand. It has bristle-like hair that keep it warm in the cool currents of the sea.

SKIN OR COVERING

What is the skin/covering of your creature like and why?

Thick, tough, wrinkled skin covered in bristle-like hair for warmth and protection.

IT LIVES IN.....

The Galapagos Islands
