

What is Design & Technology?

In Design and Technology you will learn the skills and abilities to engage positively with the designed and made world and to harness the benefits of technology. You will learn how products and systems are designed and manufactured, how to be innovative and to make creative use of a variety of resources including digital technologies, to improve the world around you!

In Design and Technology you make products from a variety of materials including Woods, Metals and Plastics. You will learn to safely use a variety of tools and equipment that you might not be familiar with including saws, soldering irons and 3D Printers.

But you also use modelling and craft equipment like paper, card and scissors.

On this sheet you are going to make a Cubee. A Cubee is a paper model of a person made out of cubes constructed out of flat 2D net.

TASK

– draw 4 of your friends or members of your family into the Cubee outlines.

TASK – Pick your favourite design from the previous page and fill in the net to look like your final design. Carefully cut the full lines and fold the dotted lines. Add glue to the parts marked ‘tab’ and stick together.
