

Try three different ways of making sounds to explore how they make sounds of different pitch.

For each type of sound, write its name and draw a diagram of it in the box. Label your diagram to show how you made high and low sounds.

Complete the table for each sound, noting down any observations you made about the way high and low sounds are made.

Sound:		
Diagram	Observations	
	How did you make a high sound (high pitch)?	
	How did you make a low sound (low pitch)?	

Sound:
