Walkley to benefit from Government funding for solar panels

Dear parents and carers

We are delighted that Walkley Primary School will be one of only three schools in Sheffield, two-hundred nationwide, to benefit from Great British Energy's first project; putting rooftop solar panels on schools and hospitals.

Having solar panels on our new school building is something we have sought since securing DFE Funding 10 years ago. Installation will commence soon, in the Spring term.

This exciting investment in the Walkley Primary School community will support our commitment to sustainability and reduce our energy costs, allowing more resources to be invested directly into enriching teaching and learning. The new solar panels will provide our pupils with real-life opportunities to learn about renewable energy, climate action and sustainability.

With our warm community spirit, we are committed to giving our children the very best start, supporting them to be Golden citizens empowered to make a difference in life.
