

Maths Homework – Y3 Charlies – 06/12/2019

Learn Its!

This week's *Learn Its* to practise are:

$$5 \times 4 = 20$$

$$6 \times 4 = 24$$

$$7 \times 4 = 28$$

$$8 \times 4 = 32$$

Try saying them in different voices (scared, happy, shout, whisper etc.)

How many times can you say each fact in 1 minute?

Revision – Addition Learn Its

The Y3s are doing a fantastic job practising their times tables by playing TT Rockstars and as a result are super speedy at recalling their times table facts. We have noticed that they are less confident with the **addition facts** when completing their weekly Learn It challenges. Play the game below as a fun way to practise recalling these facts.

Addition 'Squares'

You will need:

2 different **counters** (these can be anything from scrap paper to coloured sweets!)

2 sets of **number cards** 5-9

The aim of the games is to claim as many complete squares as possible.

Take it in turns to turn over two digit cards and add them together.

Find the answer on the board and draw one side of the square.

The player to complete the 4th and final side of the square writes their name inside it.

The player with the most squares is the winner!

Winner = _____

12	15	11	18	13
14	11	16	14	10
15	17	12	12	18
11	16	14	19	15
12	13	18	16	19
