

Gruffalo Maths Homework Autumn Week 2

Learn Its!

This week's learnt Its to practise are:

$4 + 2 = 6$

$5 + 2 = 7$

$6 + 2 = 8$

$7 + 2 = 9$

$9 + 2 = 11$

$4 + 3 = 7$

$5 + 3 = 8$

$6 + 3 = 9$

Can you switch them?

Try saying them in different voices (scared, happy, shout, whisper etc.)

How many times can you say each fact in 1 minute?

Addition

Step 13: I can add 10 to a 2 digit number

(It's nothing new! $2 + 1 = 3$ so $20 + 10 = 30$!)

$10 + 10 =$

$60 + 10 =$

$20 + 10 =$

$70 + 10 =$

$30 + 10 =$

$80 + 10 =$

$40 + 10 =$

$90 + 10 =$

Explain a fact family to your grown up:

$4 + 3 = 7$

$3 + 4 = 7$

$7 - 4 = 3$

$7 - 3 = \dots$
